

I have lived on Wolverley Road for 26 years . Both my children walk along Wolverley Road to and from school every day , we have noticed Wolverley Road has become busier year on year since living here, more recently we have noticed an increase in traffic since the re development of the Lea Castle Hospital site housing.. Another possible 75 Quarry Lorries per day using this road would pose an incredible hazard for traffic and highway safety .The roads are not suitable for this increase.

This site for the proposed Quarry is surrounded by housing,schools and a growing community it will have a detrimental impact on this beautiful area, the wildlife with the 'refil material ? Hazardous waste that could be permitted further down the line where does this stop.... this will decimated the green belt and the community in it .

Please do not allow this proposition to proceed. Thank you.

Regards

Bridget Homer

Wolverley Road Resident.
