

Good afternoon,

I would just like to put on record mine and my family's objection to the proposed quarry in Lea Castle. Bringing my family to the area for the clean air after after twin girls born at 26 weeks in Birmingham. We were told an area like this would be perfect for our daughters who have chronic lung disease. The worry and concern this quarry and its potential health hazards in the clean air it could bring for your twins has dont nothing but cause us stress and concern. This beautiful area and beautiful green belt area is needed to be preserved for the future of this country and even though the previous inspector made a few errors on his judgment, 99% of it was still the same and so the decision should still be the same based on that alone. I trust that of a fair inspection will find this.

Kind regards

Joe Harvey
