

To whom it concerns,

I am writing to object to the proposed quarry. I live in the village of Cookley and soon be moving to The Crescent. I have lived here for 4 years with my husband and we love the village and the community that comes with it.

I have many concerns regarding the quarry. Firstly the infrastructure of the local area cannot cope with this. I live near the factory in the village and at 2pm when factory workers finish their shift it's dangerously busy. This will only get worse with more traffic from the quarry. Sometimes if there is roadworks in the horse fair it can take 40+ minutes to get home from Kidderminster. This is not acceptable for a short journey. This will only get worse if the quarry opens.

I want to protect the environment for our future. I am not naive to think that the work in the quarry isn't needed but the impact on the wildlife would be catastrophic not to mention a blot on the landscape. I'm concerned about air pollution and how this will affect children and older adults in the local area. Surely there are other more suitable sites that could be used!?

I feel strongly that the Quarry should not go ahead. We must protect our future generations, wildlife and the natural landscape. We have seen huge developments and potentially will see more with the housing of the local area we will not be able to sustain a quarry on top of this.

I hope that whoever reads this ensures that it's passed onto the enquiry.

Many Thanks

Camilla Lloyd
